Profile:

African Agency for Arid Resources (AGAR) Ltd is a Kenya based company dealing with natural resources in the ASAL (Arid and Semi-Arid Lands) areas of Africa, specialized in the collection, grading and sale of 1st and 2nd grade Gum Arabic, Frankincense, Sweet Myrrh/Opoponax and Myrrh (and soon Aloe and Agave) together with the processing of these resources into powdered gum Arabic and essential oils. We also source other essential oils indigenous to Kenya for domestic distribution

Capacity:

AGAR Limited has the capacity to supply buyers with up to 100 metric tonnes of gum Arabic, raw or powdered, in the course of one year divided into monthly or quarterly consignments. For our essential oils production, we can supply buyers with up to 2,000 kgs of Frankincense essential oil and up to 500 Kgs of Sweet Myrrh essential oil in the course of one year, divided in monthly or quarterly consignments. Furthermore, we can provide perspective buyers with large volumes of Frankincense hydrosols from our industrial distillation.

Product Summary: Frankincense Essential Oil

Frankincense is among the most widely used of all essential oils: Its benefits are numerous and it has been used extensively in traditional cultures for many thousands of years. Several research groups have found that frankincense has promising anti-inflammatory effects, also helping to boost Immune system function and prevent illness. Frankincense is also an antiseptic and disinfectant agent that has antimicrobial effects: It has in fact the ability to eliminate cold and flu germs from the home and the body naturally.

INGREDIENTS

Specs: Boswellia Neglecta* (Frankincense) – All analysis available
†100% pure, therapeutic-grade essential oil sourced from Kenya.

AVAILABILITY

We sell our oil in 10ml – 15ml – 30 ml – 100 ml for retail purposes, branded or not. We pack our bulk volume for export in 20 litres drums

Product Summary: Sweet Myrrh Essential Oil

For many centuries, Sweet Myrrh – Opoponax has been used in perfumery and for treating wounds and clearing respiratory congestion. Sweet Myrrh essential oil exerts a drying action on mucous membranes, allowing relief from bronchitis, colds, sore throats, and coughs.

Similar to Frankincense, Sweet Myrrh/Opoponax is used for its antiseptic and anti-parasitic properties. The oil also possesses powerful relief for stomach ailments, arthritis, inflammation, and muscle pains.

INGREDIENTS

Specs: Commiphora Holtziana* (Opoponax) – All analysis available
†100% pure, therapeutic-grade essential oil sourced from Kenya.

AVAILABILITY

We sell our oil in 10ml – 15ml – 30 ml – 100 ml for retail purposes, branded or not. We pack our bulk volume for export in 20 or 25 litres drums.

Product Summary: Gum Arabic

Rich in soluble fibre, gum Arabic is sourced from the sap of the Acacia Senegal tree, a plant native to the arid parts of Sub-Saharan Africa. Also known as acacia fibre, gum Arabic is said to offer a number of health benefits. Due to its high soluble fibre content, gum Arabic is thought to help lower cholesterol levels, keep blood sugar in check, protect against diabetes, and aid in the treatment of digestive disorders such as irritable bowel syndrome (IBS). A soluble fibre, it dissolves in water and forms a gel-like substance in the intestines. Gum Arabic is also said to be prebiotic (a non-digestible food ingredient in dietary fibre that can stimulate growth of beneficial bacteria in the intestines). Gum Arabic powdered or spray dried will end up in a vast array of sectors mostly as a binding agent, a natural emulsifier and a stabilizer

INGREDIENTS

Gum Arabic ver. Kerensis* (Acacia Senegal ver. Kerensis) - All analysis available
†100% pure (E414)

AVAILABILITY

We provide buyers with larger quantities and can export it to their desired destinations in 25-50 kgs sacks.
